Airslide Fabric Technical Specification

- Specification sheet of polyester airslide fabric:

Inspection Standard:	Q/320621CBC01-2011
Material:	Polyester Staple Fiber
Weight (g/m ²):	3800-3900
Lenght (m):	20-100
Width (mm):	250,270,480,580
Thickness (mm):	5-8
Breathability (2m ³ /m ² min)	800pa-1200pa
Breathability (<3m ³ /m ² min)	<2000pa
Breaking Strength (N/mm)	Warp Direction \geq 5600N/mm Weft Direction \geq 4400N/mm
Operating Temperature (°C)	Continuous Operation 220 , Instant Operation 250
SKU	m ²
Availability:	In Stock

Ps: Tolerance of thickness: +/- 0.3mm , gram weight: +/- 3%, air permeability: +/- 10%.

•**Porosity:** the pores are suitable, uniform distribution, distribution of gas dispersion is high, less affected by the thickness of grain layer;

•**Corrosion resistance:** a certain strength, wear-resistant, suitable for ordinary portland cement and fly, cement, PVC, alumina powder, calcium oxide, soda ash, etc .; physical and chemical properties of stability;

•**Through the nature:** only through the gas, can not through the powder; moisture absorption, low adhesion, smooth surface, easy powder flow, long-term use is not blocked, and easy to restore breathability;

•**Inspection report:** issue test report.

Common specifications are [250mm](#) [270mm](#) [480mm](#) [580mm](#).
